

Dear Alpha Psi Education, Scholarship & Leadership Foundation, Inc.,

Within 10 years after graduation, my aspirations I hope to accomplish include giving back to the profession as a leader, mentor, and preceptor. Additionally, I hope to advocate for the underserved patient population.

I hope to play an active role in national organizations such as the ASHP Foundation and Phi Lambda Sigma Leadership Society where I will play a proactive position in changes within the profession. As a mentor and preceptor, I would like to use my role to create a supportive environment for growth, development of students, and continuous education. I will be an engaged preceptor utilizing the coaching leadership style with students while on rotations. This will allow me to motivate students to be active in their learning and feel comfortable to ask questions. I will give back to the chapter as an alumni to mentor students on the next journey of their careers. For active members, I would assist them with interview preparation, help with leadership 101 presentations, and offer pharmacy school advice. For final year students, those interested in residency, I would assist with CV and letter of intent reviews. For the chapter, I will make myself available to support the Brothers and continue the cycle as other alumni have done for me.

I have a passion to make a difference in patient care for the underserved community. I hope to be proactive as a preceptor for events such as the annual Phi Delta Chi, Medicare Health Fairs and Diabetes Care Clinics. This will allow me to advocate for patients and their health needs prior to meeting with their primary care provider. In addition, I hope to use my clinical skills to help patients in other countries such as Nigeria where natives unfortunately lack adequate medical care. As a member of organizations, such as Doctors Without Borders, I will use my skill set, internationally, to assist other healthcare professionals when tending to patient needs. I believe that access to good healthcare is a necessity, therefore within these roles, in the underserved community, I hope to truly make a difference for those who need it most.

I envision that in my future, I will stay proactive within organizations and leadership roles. I am passionate about mentorship, leadership, and the positive growth that results from them both. Through the foundation and alumni presence, I have been able to achieve more than I could have imagined. I will take these experiences and support as motivation to achieve my aspirations to make a change in pharmacy and within my community.

Adesuwa Aigbuza, PharmD Candidate 2025
