

Distinguished Alumni,

It is my honor to nominate Brother Noah Antonio for the Gerald A. Miller Scholarship. Throughout his years within the fraternity, Noah has always been a supporting presence. He is always willing to lend a helping hand and take on the tasks that people normally tend to stray from. Not only have I been able to witness Noah's contributions from going through candidacy together as well as going through pharmacy school together, I have also had the privilege to serve on the executive board under Noah's leadership as WCC. He is an extremely hard worker and pours all his energy into academics and serving the fraternity. As well as serving as WCC, Noah also serves as a project manager for the Bone Mineral Density committee in pharmacy school and participated in the reputable Medicare Part D elective where he served on the vaccinations subcommittee, which requires many hours outside of the classroom serving patients during health fairs. On top of his many obligations, Noah is also able to balance his academics and works very hard to maintain his grades. I have witnessed him study well into the night, as well as early morning, and he has been consistently attending lectures as well. As WCC, Noah has created a safe space for brothers to share their concerns, created many initiatives such as a recycling project, supported his executive board wherever needed, and he was also not afraid to lean on his board whenever he needed assistance himself. He is a calming and friendly presence within the fraternity and a respected role model to the younger brothers.

I have seen Noah's character grow tremendously for the better over the years. He is willing to carry a lot on his shoulders to make sure the brothers are well taken care of and he does it all without any complaints or reservation. Noah is a trusted and honorable classmate, friend, and brother and I thank you for considering him to be the recipient of the Gerald A. Miller Scholarship. Please feel free to reach out to me with any additional questions or elaborations needed.
